EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Barry Haley on December 29, 2005.

The application has been amended as follows:

IN THE ABSTRACT

In the Abstract, line 1, delete "improved";

line 8, after "intensity", insert --. A first end of the fiber optic bundle is a hemispherical concave shape and abuts the LED light source.--

IN THE CLAIMS

In claim 1, lines 17, after "wherein", replace "the" with --a--;

lines 17-18, replace "that covers the" with --covers a--;

line 18, replace "is" with --and has--;

line 19, after "LED" insert --light source--;

line 20, after "LED" insert --light source--.

In claim 2, line 2, replace "bundles that cover" with --bundle that covers--;

line 2, insert --the-- before "LED";

lines 2-3, replace "is preferred so that" with --allows--;

line 3, replace "can" with --of the fiber optic bundle to--.

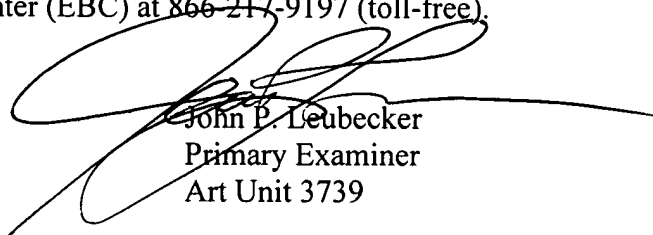

2. The following is an examiner's statement of reasons for allowance: Although the Examiner respectfully disagrees with Applicant's contention that the Examiner used an "obvious to try" test when applying the prior art to Applicant's claims, and takes the position that the combination of prior art references, although found using hindsight, does not require hindsight, nor Applicant's disclosure, to properly teach or fairly suggest the previously claimed invention, Applicant amends claim 1 to include the limitation that the portion of the first end of the fiber optic bundle that covers a surface of the LED light source is hemispherical concave shape. Although this limitation by itself is shown in the prior art, for example, by Kim (U.S. Pat. 5,791,965) (note col.2, lines 48-57), no prior art of record (including Kim) that shows such limitation provides proper motivation to modify any other prior art of record to construct a device as claimed. Kim discloses a device in a different field of endeavor and proffers no reason for the particular coupling between the optical fiber bundle and light source. Therefore, the combination of elements as now recited in claim 1 is allowable over the prior art of record. It is noted that the amendments made above are only to correct issues of indefiniteness and are not material to the patentability of the claim with respect to the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Leubecker whose telephone number is (571) 272-4769. The examiner can normally be reached on Monday through Friday, 6:00 AM to 2:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
